

BlockChain.pdf
PDF

creates a notes of these all topics in deep and detailed version in hinglish for notes making elaborate each topic as a story

Great! Let's create deep, detailed Hinglish notes from your uploaded content (**BlockChain.pdf**) in story format. These notes will explain each topic as a relatable journey, almost like storytelling — making them easy to understand and memorable.

Global Currency & Blockchain Economics (Hinglish Story Notes)

□ Kahani Currency Ki (The Story of Currency Value)

Ek samay ki baat hai... duniya mein sab log kisi bhi cheez ko exchange karte the — barter system! Par jaise jaise economy badi, paisa aya, aur currency ne duniya sambhali. Lekin kya currency ko asli value kaise milti hai?

Currency Gets Value Because:

1. **Logon ka bharosa (Trust):** Agar log maan lete hain ki ₹ ya \$ valuable hai, toh wahi uski asli taqat hoti hai.
2. **Acceptance:** Agar sabhi log use use karte hain, toh wo ek legit currency ban jaati hai.
3. **Limited Supply:** Har cheez ki value tabhi hoti hai jab wo rare ho.
4. **Backing:** Kahi baar currency kisi valuable cheez se "backed" hoti hai jaise ki gold, oil, ya economy.

Currency Value Ke Types: Ek Market, Ek Sarkar

1. Market-Based Value (Floating Rate)

Sochiye ek bazaar hai jaha INR aur USD ka daam supply aur demand se tay hota hai:

- **Jyada log INR bech rahe hain aur USD kharid rahe hain?**
 - INR ki value girti hai, USD mehenga ho jata hai.
- **Jab log India me invest karna chahte hain aur INR chahiye?**
 - INR ki value badhti hai, USD sasta ho jata hai.

2. Government Controlled (Fixed ya Managed Rate)

Kuch countries apni currency ko control karte hain:

- Example: UAE ka Dirham fix hai — 1 USD = 3.67 AED
- Isko maintain karne ke liye central bank USD buy/sell karta hai.

Factors Jo Currency Ko Mazboot Banate Hain

◆ Factor	🔍 Kya Impact Hota Hai?
High Interest Rates	Foreigners invest karte hain high returns ke liye
Strong Exports	Currency ki demand badhti hai
Stable Government	Investors bharosa karte hain
Low Inflation	Currency ki value bana rehti hai
Foreign Direct Investment (FDI)	Currency ki demand badh jaati hai

Factors Jo Currency Ki Band Baja Dete Hain

▼ Factor	💥 Problem Kya Hota Hai?
High Inflation	Currency ki value girti hai
Political Instability	Investors bhag jaate hain
Trade Deficit	Import zyada, export kam → paisa bahar jaata hai
Excessive Money Printing	Supply badhti hai → Value gir jaati hai

India USD Kaha Se Laata Hai?

1. **Exports** – USA ko saman bech kar.
2. **FDI** – American companies India me invest karti hain.
3. **Remittances** – NRI apne ghar paise bhejte hain.
4. **Tourism** – Foreigners India aake INR me paisa convert karte hain.

RBI Role:

- Jab demand hoti hai, RBI USD sell karta hai.
- Reserves girte hain → agar zyada USD sell ho jaye.

Global Currency Ki Zarurat Kyu Hai?

Problem 1: 💵 Exchange Rate Volatility

- Kabhi ₹ weak hoti hai, kabhi strong.
- Business ko loss hota hai — koi rate fix nahi rehta.

Problem 2: Currency Wars

- China ya US jaise desh apni currency ko intentionally cheap banate hain taaki unka export sasta rahe.
- Is se global imbalance hota hai.

IPL Auction Aur Dollar Connection

Pehle IPL auction dollar me hoti thi. India ki currency fluctuate karti thi, toh budget banana mushkil hota tha. Fir ₹ me shift kiya gaya — easy for planning.

China Devaluation Story

China apni currency ki value intentionally giraata hai — cheap exports ke liye. Unka maal sasta dikhta hai duniya ko.

Dollar Ka Global King Banane Ka Safar

1. Pehle Pound Sterling world currency tha.
2. WWII me UK ki economy toot gayi.
3. US ne 50% global GDP aur 70% gold hold kiya.
4. 44 countries ne Bretton Woods agreement sign kiya — USD base ban gaya.
5. Vietnam War ke time US ne bohot paisa print kiya.
6. Saudi Arabia ne USD ko oil se back kiya.
7. 2008 Lehman Brothers collapse (\$600B).
8. Bernie Madoff scam (\$65B).

 Isse duniya ne trust kiya USD par — aur woh ban gaya world ka **default currency**.

Agar 1 Dollar = 1 Rupee Ho Jaaye To? (Hypothetical)

▼ 1. Trade & Export Collapse

- ₹100 ki cheez = \$100 ban jaayegi
- Indian goods costly → Export zero
- Textiles, IT, Gems – sab band

▼ 2. Imports Dirt Cheap

- Oil, phones, machinery sab cheap milne lagega
- Par local industries band ho jayengi — kyunki unka maal mehenga lagega

Bonus Concept Recap Chart

 Concept	 Description
Currency Value	Trust + Demand + Limited
Floating Rate	Market based movement
Fixed Rate	Govt. backed rate
Currency Strength Factors	Exports, FDI, Stable Govt
Currency Weakness Factors	Inflation, Instability, Trade Deficit
USD Ka Global Dominance	WWII + Gold + Oil Trust
RBI Role	Reserves handle karta hai
Currency War	Intentional devaluation
If \$1 = ₹1	Export down, Import boom, Economy crash
